

STRATEGIC ADVISORY

We support and enable you to innovate and succeed in your ambitions

We support and enable our clients to innovate and succeed in their ambitions with access to our global thought leaders and our full spectrum of experience in developing, implementing and operating electricity and energy assets.

Global energy specialists you can trust

We bring expert strategic advice to all aspects of energy assets and electricity. We help you plan, implement and operate utilities and energy companies and skillfully counsel you on all issues you deal with. Our trusted senior consultants bring global exposure and in-depth knowledge of emerging energy topics to your organization to aid you in critical areas such as:

- Asset strategies and asset management plans
- Strategic project business case reviews
- Business case development
- Organizational and business process streamlining
- Regulatory compliance advice
- Planning and positioning

We deliver results

Our practical strategic direction helps you meet deadlines and budgets, get the most out of your team, and optimize regulatory compliance. Twenty-five years of global-on-the-ground electricity experience has birthed real-world solutions that fix any problem you face. We understand your needs and have a proven track record with an expansive range of companies, such as electricity generators, distribution utilities, transmission companies and energy asset owners and developers. We solve problems related to upgrading an outdated grid, a labor pool that is getting on in age, and transitioning to alternative energies.

Strategic Advisory highlights

- We offer clear strategic advisory services across the entire energy value chain to help save you time and money.
- We provide objective and applied excellence for solutions that are theoretically sound and grounded in the real world.
- The long-term partnerships with our clients who hold us in high esteem, are a testament to our value-added services.
- Our global team of consultants can be rapidly deployed to meet your needs.

What we do

We help you build a bridge from your current challenges to a bright, energy-efficient and sustainable future.

The electricity industry is confronting dramatic changes and companies worldwide race to address those in cost-effective ways. PSC's trusted senior consultants have dealt with a large range of client concerns worldwide for over 25 years. This has led to a wealth of knowledge and in-depth experience that's ready to be deployed for your benefit. From developing technology road maps to support and development reviews, we provide real-life practical tools that make your job easier and help you succeed.

We help you power a more sustainable world.

How we help you

We have the benefit of having worked with many different energy companies around the globe for over two-and-a-half decades, and the countless lessons we have learned make us uniquely qualified to provide expert strategic advice.

The present situation our industry finds itself in provides not only challenges, but great opportunities. We have key thought leaders and experienced senior consultants strategically positioned in Asia Pacific, Australia, New Zealand, Europe and North America. They're ready to deploy at a moment's notice to support you and give you the tools you need to thrive.
