

OPERATIONAL TECHNOLOGIES

Translating Operational needs into high performance OT systems

Working at the intersection of OT and IT, PSC helps utilities turn business and operational needs into practical technology solutions built for real-world utility conditions.

Our unique strength lies in our blend of decades of OT field experience and robust IT capability, independent vendor-neutral advice with local delivery. Together, these capabilities enable us to translate utility goals into robust, pragmatic OT solutions.

PSC's Operational Technology (OT) specialists bring extensive hands-on experience across leading monitoring, control, and automation platforms. We provide vendor-neutral guidance across SCADA, EMS, DMS, ADMS, and DERMS systems, helping utilities design, modernize, implement, and sustain mission-critical operational technologies.

What we deliver

By combining deep OT and IT expertise, PSC helps utilities achieve greater system reliability, clearer operational visibility, and lower operational risk across realtime environments. Our solutions are designed for safe, efficient implementation and deliver measurable operational improvements that align with everyday operational realities.

Advisory Services

[Empowering informed, future-proof OT decisions](#)

We help operators define long-term OT strategy, assess current systems, develop technical specifications, evaluate vendors, and build roadmaps to set organizations up for success.

SCADA / EMS / ADMS Project Services

[Expert leadership for mission-critical control systems](#)

Our senior engineers lead the full lifecycle from design, procurement, implementation, testing, and commissioning to de-risk complex projects and ensure timely delivery.

System Integration & Solution Development

[Tailored systems that enhance real-time operations](#)

We integrate platforms, connect data flows, streamline operator workflows, and create unified operating environments that improve situational awareness and resilience.

System Modernization, Upgrades & Migrations

[Future-ready systems with minimal disruption](#)

PSC delivers platform upgrades, technology transitions, and modernization programs that enhance reliability and maintain continuous operations.

Program Management

[Structured oversight for complex initiatives](#)

Our governance frameworks keep multi-vendor, multi-stakeholder programs aligned, on schedule, and delivering measurable outcomes.

Telecommunications, Networks & Security

[Building the backbone of modern OT environments](#)

We build secure, high-performance network architectures that enable reliable real-time operations.
